Summary

- ✳ 30+ years in technical writing for companies in telecommunications, financial services, e-commerce, and blockchain, including 10+ years leading documentation teams and strategy.
- ✳ Led large-scale documentation migrations using Docs as Code, Markdown, MadCap Flare, DocBook, DITA, and single sourcing.
- ✳ Built and mentored documentation teams, establishing standards and procedures.
- ✳ Provided company-wide documentation governance by creating templates, style standards, and editorial processes for sales, marketing, pre-sales, and product management teams.
- ✳ Technical skills: Docs as Code, Markdown, GitHub/Git, static site generators (Hugo/MkDocs/Zensical), MadCap Flare, API documentation, structured authoring (DITA/DocBook), CI/CD pipelines (DocOps).

Professional Experience

R3 | Senior Technical Writer

Aug 2022 to Jan 2026

R3 is a leading provider of digital currency, digital assets, and interoperability solutions using blockchain technology.

As Senior Technical Writer, I:

- ✳ Produced procedural, reference, and developer documentation using Docs as Code methodology. Content was written in Markdown, stored on GitHub, and published via automated pipelines using Hugo. The resulting developer portal enabled internal and external developers to make full use of our Corda DLT platform.
- ✳ Authored user guides, reference manuals, training manuals, and API documentation. These instructed central bank, commercial bank, and financial institution staff in the use of our digital currency and assets solutions.
- ✳ Drove revenue and exceeded client expectations by coordinating the production of requirements, design, and RFP response documents from multiple sources of information. I transformed Word, Markdown, and Confluence content into print-ready PDFs using partially automated workflows for rapid turnaround.
- ✳ Implemented a free open-source Pagefind search solution for Hugo. This replaced an existing commercial solution costing thousands per annum.
- ✳ Provided other departments with documentation governance: for example, produced Word templates, and reviewed and edited material.

Fenergo | Technical Writer

May 2018 to Jul 2022

Fenergo is an Irish “unicorn” company valued at €1bn that consistently ranks as the number one provider of Client Lifecycle Management and Know Your Customer (KYC) solutions.

As a Technical Writer, I:

- ✳ Migrated their documentation from an intranet of Microsoft Word documents to a fully searchable document portal using Docs as Code methodology. This involved converting all documentation to Markdown, storing it in Azure alongside the codebase, automating its conversion to MadCap Flare files using a third-party plugin, and publishing to a MadCap Central documentation portal. The new documentation portal enabled internal and external developers to find up-to-date information more quickly.
- ✳ Authored Fenergo’s FenE documentation portal, which included product guides, API guides, and release notes, working in an Agile environment.

BAE Systems Applied Intelligence | Documentation Group Lead

Jul 2007 to May 2018

BAE Systems Applied Intelligence (formerly Detica, formerly Norkom) delivered solutions to monitor transactions and protect clients against cyber-crime, financial crime, and money laundering.

As Documentation Group Lead, I:

- ✳ Led a team of writers that documented its NetReveal platform (Application Builder, Workflow Configurator, and Scenario Manager) and its associated financial crime, AML, fraud detection, and compliance solutions using MadCap Flare.

- ✳ Led the migration of legacy Word documentation to MadCap Flare, creating a single-sourced solution that could produce both PDF output and online help.
- ✳ Delivered regular updates to installation, configuration, UI, and reference documentation.
- ✳ Produced online documentation using MadCap Flare, enabling both internal services staff and clients to quickly build custom AML solutions, reducing time to market.
- ✳ Provided other departments with documentation governance: for example, produced in-house Word templates for internal and external documentation, and reviewed and edited material.

Valista | Documentation Team Lead

Nov 2001 to Jul 2007

Valista was a winner of GSM World awards, producing payment applications for customers including AOL, Vodafone, NTT Docomo, O₂, Taito Corporation, and France Telecom (now Orange).

As Documentation Team Lead, I:

- ✳ Led a team of writers that produced documentation for its suite of mobile commerce products, including installation, configuration, UI manuals, and API documentation for developers (Microsoft Word/DocBook).
- ✳ Migrated documentation from Microsoft Word to an automated open-source, single-sourced, reusable modular DocBook documentation model using XMLMind, DocBook XSL, Saxon, FOP and Ant.
- ✳ Produced in-house templates for internal and external documentation, and created stylesheets for our Javadoc developer references.

Early Career Summary

Sepro Telecom International | Technical Writer

1997 to 2001

- ✳ Online help
- ✳ ForeHelp
- ✳ API documentation
- ✳ Intranet

Accuris | Technical Writer

1997 to 1997

- ✳ Microsoft Word
- ✳ Microsoft Help Workshop

Telecom Ireland Software | Technical Writer

1994 to 1997

- ✳ Microsoft Word
- ✳ Adobe FrameMaker
- ✳ RoboHelp

Skills

Static Site Generators

Hugo, MkDocs, Jekyll, Material for MkDocs, Zensical

Authoring Tools

MadCap Flare, MadCap Central, MadCap Analyzer, Confluence, DITA, Microsoft Word, AsciiDoctor, XMLMind Editor, Docutils, Sphinx, Oxygen Editor, DocBook XSL, Typora, RoboHelp, Adobe FrameMaker

Version Control and Issue Tracking

Git, GitHub, Azure, Jira, SVN (Subversion)

Graphical Tools

Photoshop, Visio, Lucidchart

Programming and Standards

Markdown, DITA, DocBook, Java, Microsoft Word Visual Basic, Perl, HTML, XML, SQL, YAML, JSON

Operating Systems

Windows, Linux

Education and Professional Development (Selected)

B.A. (Mod) in Computer Science: Trinity College Dublin

Technical Authoring Training Programme (Intro/Intermediate/Advanced): Armada Training Solutions

Team Leadership: Clohessy Consulting

Managerial Training: BAE Systems, London

Software-Specific Structured Project Management: Fergus O'Connell
